

Course : Web Programming I (FSD101)	Assignment 1	
Instructor: Kadeem Best	Date Given: February 1st 2020	Date Due: February 27th 2020

Notes for the Student: This Assignment is designed to give you practical experience in building a Responsive Design Website using native HTML5 and CSS3 code.

Background: You will need to have access to an IDE or text editor and have a thorough understanding of HTML 5 and CSS3.

Assignment Submission Requirements

- A written report should be emailed to me by midnight on the deadline date.
- The written report must be in pdf format and must contain the following :-
 - A cover page.
 - A table of contents.
 - The link to the original theme from <https://www.wix.com/website/templates>
 - A link to the GitHub Repository
 - A link to the hosted website
 - Screenshots of your website, with relevant descriptions, detailing whether the functionality was met or not met, as specified below.

Assignment Regulations

- This assignment must be done individually.
- You must present your website to the class on Saturday, February 29th 2020, you have 10mins to do so.

Detailed Specification

You have been tasked with the responsibility of developing a responsive website.

For your website, you **MUST** choose **A** theme from <https://www.wix.com/website/templates> and emulate the home page **and** two other content pages of your choice. Please note, in addition to the desktop view, your website **MUST** also mimic the look and feel of the selected theme for tablet and mobile phone view.

Also, if present, omit all animation on your template pages. Note, your web page must exude the spirit of the selected theme. Thus, try to get it to look as closely to the theme as possible.

Lastly, please note that you are **NOT** allowed to use any CSS Frameworks, you **MUST** use native CSS3 and HTML5 code ONLY!
